Celebrating our Mentors: Miss Nevra

Miss Nevra graduated from Walter Johnson High School and is now currently majoring in Data Science, focusing secondarily on communication and psychology.

Throughout her school years, she took a rich blend of various AP and Honors courses. She always excelled in all of her English and Literature classes and now wants to share that passion with all of her English students here at SpiderSmart and Academic Pathways. During her last year of high school, Miss Nevra was able to work as a teacher's aide for an Advanced Technology Applications course.

Nevra has been working with our SpiderSmart and AP students for about a year now. She loves helping students with their reading and writing skills, and truly enjoys being able to see how much progress each child makes throughout their time with us here at the center!

Our Future & You

At SpiderSmart and Academic Pathways, we envision a world in which every child is taught to think independently, strive for knowledge, and live intentionally with empathy and caring. **We know the power of an education that celebrates individuality and helps kids rise to the challenges of life, academically and beyond!**

As a small business with big dreams, the referrals of our families mean the world to us. **Your continued trust and support is invaluable.** There is nothing we love more than working with students to reach their full potential and achieve their goals!

That's why we offer a \$50 credit to our families per child referred to our programs! If you know someone who would benefit from our work, we would love to welcome them into our ever-growing family.

From all of us at AP, thank you for helping us continue to reach new heights!
